WORK EXPERIENCE

Iriska Ltd.   **Sep. 2019 – Present**
Project Manager Pharmacist   *London, UK*
- Iriska is a veterinary medicines company licensing human medicine for the companion animal healthcare market
- As the main project manager, oversaw the product roadmaps, marketing, and licensing
    - Managed the registration of two human generic drugs, as well as one first-in-kind veterinary medicine
    - Worked with R&D team to further develop two more veterinary medicines, pending registration
- Secured partnership with Chinese veterinary medicines manufacturer for in-licensing of products for UK market
- Responsible for communications with regulatory authorities and scientific meeting preparations

Green Light Pharmacy   **Aug 2018 – Aug 2019**
Pre-Registration Pharmacist   *London, UK*
- Training and educating fellow team members with presentations on different clinical areas of Pharmacy
- Communicating with primary healthcare teams to ensure seamless patient transfer into different care settings
- Clinically checking and dispensing of prescription medicines, including controlled drugs and methadone

University College Hospital   **Jun 2017 – Jul 2017**
Summer Research Student   *London, UK*
- Analysed hundreds of patient discharge medicine summaries to track average time taken to discharge patients
- Presented data at ward meeting and recommended hiring of on-ward dispensers to reduce time taken to discharge patients, ultimately increasing the number of beds available at the trust

EDUCATION

SheCodes Coding Workshop   **Sep. 2021-Present**
- Coded website landing page for an events company using HTML5, CSS and Javascript ES6, which was featured on the alumni final projects page and social media
- Learnt basic wireframing in the process of making a weather forecast application, using live API integration
- Promoted SheCodes on social media by taking part in interviews, connecting with peers and blogging about coding journey online

University College London   **2014-2018**
MPharm, Master of Pharmacy   *London, U.K*
- MPharm Thesis working with University College Hospital's Macmillan Cancer Unit, analysing database of patient data to identify the need for increasing diagnostic testing intervals with chemotherapy drugs
